Introduction:

Respect for human rights has become a strong trend internationally. Kyoto Prefecture is moving forward with projects to find a solution to human rights problems, such as discrimination, in order to realize a society in which dignity and human rights between individuals are respected. Everybody must be guaranteed the right to fulfill their desires pertaining to study, gaining qualifications for enrollment in a particular school, and entering work of their choice.

In order that the fulfillment of enrolling into schools, learning at schools, skill acquisition and entering work is not restricted by financial constraints, Kyoto Prefecture provides a multi-tiered support system. As detailed in article 97 of the Japanese constitution, 'fundamental human rights are the fruit of years of effort by mankind for gaining freedom'. Likewise, this support system has been built-up due to the efforts of our predecessors.

Those interested in receiving support should consult in depth with their parents/guardians and teachers at school and then make full use of the system in order to open up their future and create a society in which mutual human rights are respected.

- Kyoto prefectural municipalities organize other support systems independently. Please do not hesitate to make necessary enquiries to your local municipal government.
- When applying, please make the necessary enquiries to the appropriate office as the content of the articles contained within this guide are partially subject to change.

- Kyoto City, an ordinance designated city, organizes support systems independently.
For any details, please contact the Kyoto City government offices or call the Kyoto City Consultation Center (kyouto-itsudemo-coru) at 075-661-3755 between 8:00 am and 9:00 pm.
The center is open seven days a week.
